

std::exception

```
graph BT; detail[detail::exception] --> std[std::exception];
```

The diagram illustrates the relationship between two C++ exception classes. At the bottom is a gray rectangular box labeled 'detail::exception'. At the top is a white rectangular box with a black border labeled 'std::exception'. Two blue arrows originate from the top edge of the 'detail::exception' box and point upwards to the bottom edge of the 'std::exception' box, indicating that 'std::exception' inherits from 'detail::exception'.
