

`std::false_type`

```
graph BT; A["detail::is_constructible_tuple< T1, T2 >"] --> B["std::false_type"]
```

The diagram illustrates a relationship between two C++ types. At the bottom, a gray rectangular box contains the text `detail::is_constructible_tuple< T1, T2 >`. Two blue arrows originate from the top of this box and point upwards to a white rectangular box at the top, which contains the text `std::false_type`. This visualizes that `detail::is_constructible_tuple< T1, T2 >` inherits from or is a specialization of `std::false_type`.

`detail::is_constructible
_tuple< T1, T2 >`
