

```
detail::output_adapter  
_protocol< CharType >
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray box containing the text 'detail::output_stream_adapter< CharType >'. At the top is a white box with a black border containing the text 'detail::output_adapter_protocol< CharType >'. Two blue arrows originate from the top of the gray box and point upwards to the bottom of the white box, indicating that the gray class inherits from the white class.

```
detail::output_stream  
_adapter< CharType >
```
