

```
detail::output_adapter  
_protocol< CharType >
```

The diagram illustrates an inheritance relationship between two C++ classes. A light gray box at the top contains the class `detail::output_adapter_protocol< CharType >`. A darker gray box at the bottom contains the class `detail::output_vector_adapter< CharType, AllocatorType >`. Two blue arrows point upwards from the bottom box to the top box, indicating that `detail::output_vector_adapter` inherits from `detail::output_adapter_protocol`.

```
detail::output_vector  
_adapter< CharType, Allocator  
Type >
```
