

is_detected< Op, Args... >

detail::is_detected
_lazy< Op, Args >

The diagram illustrates the relationship between two C++ function signatures. A light gray box at the top contains the signature `is_detected< Op, Args... >`. A darker gray box at the bottom contains the signature `detail::is_detected_lazy< Op, Args >`. Two blue arrows originate from the top of the bottom box and point upwards to the `Op` and `Args...` parameters of the top box, indicating that the bottom signature is a specialization or overload of the top one.
