

udt::name

```
graph BT; A[udt::contact_book] -.->|m_book_name| B[udt::name];
```

The diagram illustrates a relationship between two user-defined types. At the bottom, a gray rectangular box contains the text 'udt::contact_book'. A dashed purple arrow points upwards from this box to a white rectangular box at the top containing the text 'udt::name'. To the right of the arrow, the text 'm_book_name' is written in a light gray font, indicating the name of the member function or attribute that facilitates this mapping.
